

Regus PLC

Case Study

Profile:

Regus PLC is a multi-national corporation that provides serviced office accommodation in business centres. It operates 1,800 business centres across 100 countries. Regus PLC also offers access to their global business network.

Technologies Deployed:

Cloud computing, high-speed data LAN's, Wi-Fi and Internet

Works:

Wow WiFi engaged on a consultancy proof of concept to investigate the use of Microsoft Cloud desktops and cloud VOIP systems to be able to deliver a unified, global business network for customers.

Very successful pilots at Pall Mall were commissioned and installed by Wow WiFi including data connectivity, Wi-Fi and internet. The concept was adopted globally and prompted a change of Regus' core managed service strategy.

"Regus were early adopters of managed services. We were looking at the cloud as our customers want to have the same experience across all Regus sites - Wow WiFi delivered that!"

Mark Dixon
Chief Executive Officer, Regus PLC
