

Regular cyber security training gives your business the highest level of protection

Small and medium sized businesses are a BIG target for cyber criminals because they invest less in security. In 2023...

343

million victims

94%

of organisations reported email security incidents.

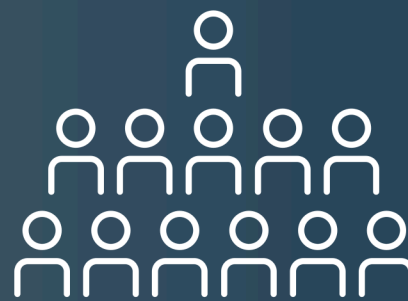

HUMAN ERROR

is one of the leading sources of cyber attacks.

EVERYONE

needs cyber security training, from your CEO to your most junior hire.

2 methods of training: Traditional and Interactive.

Traditional

- Classroom style
- Online courses
- Seminars

Interactive

- Gamification
- Simulated attacks
- Interactive workshops

Combining both is most effective.

Training should be regular as threats constantly evolve.
