

Firebox T185

Available with built-in SFP+ interface, 2.5Gb ports, 4GB RAM, and up to 1.83 Gbps UTM for high-demand sites. Plus, faster BOVPN performance.

Enterprise-Grade Security for Branch Offices and Retail Environments

The Firebox T185 is the most powerful tabletop firewall in the Firebox T Series, designed to handle heavier traffic loads in demanding environments. It features SFP+ fiber, providing flexible, high-performance connectivity tailored to your network needs. Plus, it includes a highly reliable built-in power supply and a Kensington Lock to ensure the device's physical security..

"We use WatchGuard firewalls at multiple locations. These models vary from small to large but we use the full security suite at all sites. These firewalls are easy to configure but offer exception value in the security elements that the full suite adds. This all comes at a cost point much lower than the competition."

1 Throughput rates are determined using multiple flows through multiple ports and will vary depending on the environment and configuration. Max firewall throughput tested via direct connection using 1518-byte UDP frames based on RFC 2544 methodology. All testing performed on Fireware version 2025.1.

2 UTM throughput is measured using HTTP traffic with AV, IPS, and Application Control enabled, and does not account for all security services available on the appliance.
