

Simplify compliance and reduce risk

Ensure AI-powered Microsoft 365 Copilot usage complies with governance.

As AI continues to shift work models and increase data risks, many organizations are struggling to operationalize compliance. Companies adopting or using Microsoft 365 Copilot need more than fragmented tools and manual processes to scale and adapt to regulations such as the EU AI Act.

84%

of organizations lack confidence managing data input in AI apps and tools.¹

90%+

of organizations believe they could improve their AI governance.²

~8%

of organizations have integrated AI governance into their development lifecycle or enterprise controls.³

AI regulatory compliance for Microsoft 365 Copilot

Help ensure Microsoft 365 Copilot and agent usage complies with regulations, such as the EU AI Act, organizational policies, and ethical guidelines. With Microsoft Purview, you can monitor AI regulatory compliance progress with integrated compliance tools. Visibility into Copilot interaction text, linked files, and audit log entries helps simplify support investigations, enforce legal holds, and manage the lifecycle of prompts and responses alongside other data.

Microsoft Purview helps you:

Access detailed audit log information.

Track adherence to regulatory frameworks.

Enforce retention and deletion policies.

Perform admin searches for litigation.

"With Purview, everything comes together on one platform, giving a unified foundation to innovate and move forward with confidence."
